

OpenVivo is the **UK distributor** for [g.tec medical engineering](#) , chosen by g.tec to assist in the sale and support of their products in the UK. If you are not resident to the UK or her commonwealth but wish to purchase, get more information or learn about g.tec equipment and what it can do for your life science research please contact the local distributor to your region, the list is available [online here](#) .

g.tec design **flexible, modular, multi-modal** systems for **life science research in many fields including EEG, ECG, EMG, ECoG, SpO2 and breathing rate.**

Built upon the technically excellent and robustly simple **g.tec medical engineering devices.**

We offer the only devices on market that competently control your life science experiments within the

**MatLab**

®

, **Simulink**

®

**and LabView**

®

environment. Our modular expertise means that you can

**extend our range with your own sensors**

(as long as they have a serial output), taking your existing setup and energizing it with a cutting edge amplifier, rapid prototyping environment and analytical software suite.
